

Heal(th) First

A haven for holistic well-being

Nothing Heals Better than Nature

HEALTH - THE ESSENTIAL VALUE OF LIFE

A fundamental resource, health ensures an individual functions optimally in society. Thus, rather than waiting until the end when sickness, health problems or infirmity come knocking, one should be driven to maintain health through a wholesome lifestyle. True health is a continuous state of enhanced well-being.

WHY CHOOSE NIMBA?

We at Nimba, are committed to help and inspire people to live a healthier, longer and better life. Through thorough research, Nimba Research has observed that nature has a very positive impact, both on the physical and mental state of health. Therefore, Nimba strives to bring you closer to nature. As an extension to that motto, Naturopathy follows a drugless, holistic regimen comprising of Naturopathy, Yoga Physiotherapy, Acupuncture as well as Ayurveda.

NATUROPATHY

The fundamental belief of Naturopathy is, good health is an integral part of every individual. Moreover, we believe that the human body has the innate power or immunity to sustain itself against any disease. Nimba's qualified and experienced naturopaths will help you heal, nourish, stimulate and strengthen your body's system through the powers of natural therapies, optimal nutrition and lifestyle guidelines.

YOGA & DIVINE HEALING

Famous all over the world for the holistic elevation of health, Yoga is a traditional Indian technique practised to gain control over the physical and mental health to achieve a better life. Keeping in mind the countless benefits of Yoga, Nimba incorporates Hatha Yoga, Shat Kriya, many breathing techniques and meditation. Each part of the Yoga retreat is designed to help you restore physical and emotional balance. In addition to the commonly practised forms of yoga, we encourage power, therapeutic and aquatic yoga as they're some of the most effective forms.

AYURVEDA

At Nimba, every part of the healing process is curated to meet your needs. Our team of experts use various methods to analyse your mind and body. Later, the findings and the information derived are used to prescribe a specific therapy program. Our programs have a balanced blend of Ayurveda along with Yoga, Pranayama, Meditation, Marma, Ayurvedic diet and contemplative walks with nature.

PHYSIOTHERAPY

Designed to tackle the issues that modern lifestyle and old age bring in, Nimba's Physiotherapy helps address the issue of reduced freedom of movement. Each part of the therapy is dedicated to combating restricted function caused by postural imbalances, natural ageing or disabilities using physical means. It incorporates practical exercises to improve the range of motion, correct muscular imbalances and guide you to the path of recovery.

ALTERNATIVE THERAPIES

Innovation, even in health is necessary, thus, apart from traditional therapies, at Nimba we offer other therapies which can help you attain maximum health benefits at minimum side effects. So, whether it is severe stress in the mind or too many toxins in the body, our experienced healers proactively work towards healing all your ailments.

WELLNESS CUISINE

At Nimba, we believe that health is beyond just weight-loss. However, a healthy diet and controlled weight are the pathway to a healthier life. Thus, we serve a diet depending upon the health status of every individual with special emphasis on the nutritional value of the naturally available seasonal fruits and vegetables. Careful attention is paid to make the diets wholesome by including whole grains, fresh fruits and vegetables. Special care menus are also provided by the doctors to align the specific imbalances of the individuals.

RESTORTIVE CARE

Nimba focuses on all lifestyle-related health conditions which require an outer help to enhance the healing process. Illnesses which are due to seasonal changes, toxic elements or serious health hazards need to be healed and the body has to be restored to ideal immunity strength. The treatments and therapies not only repair the damage due to disorders, but they also grant the body the power to fight against future diseases that might arise.
